

# Errata Slip

1. In the paper “SFS: Random Write Considered Harmful in Solid State Drives” (Wednesday session “Flash and SSDs, Part I,” pp. 139–154 of the Proceedings), Hyunjin Cho’s affiliation should be listed simply as “Samsung Electronics.”

2. For the paper “Characteristics of Backup Workloads in Production Systems” (Wednesday session “Back It Up,” pp. 33–48 of the Proceedings), see the online updated paper for the following changes:

- In Figure 2, the median value for backup workloads was incorrectly reported as 418G. In the updated file it has been corrected to 91G.
- In Figure 6, the locations of the X and O markers for median and mean aligned with their actual values (91% and 74% respectively). To be consistent with other graphs, in the updated file they coincide with the vertical bars corresponding to the buckets by which the values were grouped.
