

**Proceedings of the  
16th USENIX Symposium on Networked Systems Design  
and Implementation (NSDI '19)**

**Errata Slip**

In the paper “Riverbed: Enforcing User-defined Privacy Constraints in Distributed Web Services” by Frank Wang, *MIT CSAIL*; Ronny Ko and James Mickens, *Harvard University* (Thursday session, “Privacy and Security,” pp. 615–630 of the Proceedings), the authors wish to make the following clarification:

Page 623, top of the second column:

**Original text:**

Then, Riverbed deletes Bob’s current universe.

**Revised text:**

Then, Riverbed deletes Bob’s data in his current universe, using application-specific methods.
